Dear reporting contact person,

we would like to kindly remind you to consider a few special cases related to Suomi.fi identification and authorisation.

For investment fund data collections (SIRA, PEF), Suomi.fi mandates should not be sought on behalf of individual entities (funds) under the reporting obligation but on behalf the fund's management company. Logging in and reporting in the Validation Service and the Reporter Portal is only possible with a management company's mandate. More detailed instructions are available on the Bank of Finland's [website](#).

In SAVE reporting, reporting for pension foundations' departments A and B is only possible with mandates granted by the pension foundation. It is no longer possible to log in the system on behalf of department A or B.

Reporting through a service provider

We would also like to ask you to consider that, in the new Reporter Portal and Validation Service, authorisation and identification are made entirely using Suomi.fi mandates. In contrast to the DCS2 system, mandates for reporting on behalf of an obliged entity can no longer be defined in other ways at the user interface.

Logging in the system takes place on behalf of an obliged entity (excl. the aforementioned special cases). To be able to log in, the service provider must first receive a mandate for transactions from the obliged entity. Subsequently, mandates can be shared within the service provider's organisation either as a mandate to represent or a representative's right to grant a mandate. Logging in the portal is only allowed with a mandate to represent. A representative's right to grant a mandate is used to manage mandates.

More detailed instructions and examples of a service provider's mandates are available on the Bank of Finland's website.
