Validation Service of the Banks of Finland's new Reporting System has been opened

The Validation Service of the Bank of Finland's new Reporting System has been opened to reporters. The Validation Service is a test environment for reporters. Reporters may send reports to the Validation Service for checking before submitting official reports to the Bank of Finland (BoF).

Access authorisations for the new Reporting System will operate via the Suomi.fi e-Authorisations service, and reporters will manage the access authorisations themselves. Reporter must grant access authorisations before the first login to the Validation Service. The BoF has published instructions on access authorisations for the Reporting System. In addition, the Suomi.fi e-Authorisations service provides its own instructions and support for using the service.

On the opening date, the Validation Service includes reporting obligations for those entities that report the following data collections:

- **RATI** (MFI data collection)
- **PEF** (Private equity fund balance sheet statistics)

RATI web format reporting is not available at the moment. It will be opened for reporters later and it will be informed separately. File upload is working normally.

The user instructions for the Reporting System have been published on the BoF's website: [Reporter portal guide](#)

It is possible to log in to the Validation Service via the following web address <https://validationservice-reporting.finanssivalvonta.fi>

The above-mentioned data collections will be reported via the BoF's Reporter Portal according to the previously announced schedule, starting with the following reporting periods: RATI 2024M9, PEF 2024Q3.
